

Matching food-growers with land-owners in Scarborough

REGISTRATION FORM - MENTOR

By completing this form you are providing a brief summary of your skills and experience in food-growing. This, along with other details such as your availability of time and the distance you are willing to travel, will enable us to best match you with a food-grower.

Thank you very much for participating in the Growing Opportunities project.

1. Please describe your level of experience in food-growing (e.g. how many years, gardening methods/techniques, range of crops grown etc)

2. Do you generally use organic* methods when food-growing?

3. What times/approximately how many hours would you be available to mentor someone new to food-growing?

4. Would you be willing to assist at group events/workshops? *(these would be on themes such as composting, soil preparation, planning a vegetable patch etc)*

5. How far would you be willing to travel to your 'adopted' food-grower? (e.g. "less than 1 mile" etc)

6. What is the post code for where you live? (to help us identify distances to travel)

7. Do you have any other comments/ideas/suggestions?

8. How did you first hear about Growing Opportunities?

9. Would you be willing to promote Growing Opportunities to others?
(e.g. distribute posters/leaflets, word-of-mouth, newsletters etc)

*Definition of organic (from the Soil Association) in relation to the growing of plant crops:

- ☼ Pesticides are severely restricted - instead organic growers develop nutrient-rich soil to grow strong healthy crops and encourage wildlife to help control pests and disease
- ☼ Artificial chemical fertilisers are prohibited - instead organic growers develop a healthy, fertile soil by growing and rotating a mixture of crops

- I understand that my details will be entered onto a database held by Growing Opportunities. This information will not be passed onto other parties not directly involved with this project.
- I am happy for Growing Opportunities to contact me with more information about the project and to see how things are growing.
